

TOURIST ANALYTICAL DASHBOARD

Project Title: Tourist Analytical Dashboard

Project Objective

The Tourist Analytical Dashboard is designed to analyze tourism data and present meaningful insights through interactive visualizations. The dashboard enables users to monitor domestic and foreign tourist arrivals, identify top-performing states, analyze monthly tourism trends, and compare tourism performance across different regions. Interactive filters allow users to explore data efficiently and support informed decision-making.

Dashboard Overview

The dashboard consists of **two report pages**, each designed to provide a different level of analysis.

PAGE 1 – Executive Dashboard

Dashboard Title

Tourist Analytical Dashboard

Purpose

This page provides a high-level overview of tourism performance through KPI cards and interactive visualizations.

KPI Cards

Six KPI cards are displayed at the top of the dashboard.

KPI Card	Description
Total Domestic	Displays the total number of domestic tourists.
Total Foreign	Displays the total number of foreign tourists.
Total Tourists	Displays the combined total of domestic and foreign tourists.
Average Domestic	Shows the average domestic tourist count across the dataset.
Average Foreign	Shows the average foreign tourist count across the dataset.
Highest Domestic	Displays the highest domestic tourist count recorded among the states.

Purpose

These KPI cards provide an instant summary of the tourism dataset and help users understand the overall performance without analyzing detailed charts.

Filter Panel

The dashboard contains a filter panel on the left side.

Filters Included

- Select State
- Select Date & Month

Purpose

These slicers allow users to dynamically filter all dashboard visuals based on a selected state or month.

Visual 1 – Donut Chart

Title

Domestic vs Foreign Tourist Share

Chart Type

Donut Chart

Purpose

Compares the percentage share of domestic tourists with foreign tourists.

Business Insight

- Domestic tourists contribute the majority of total tourist arrivals.
- Foreign tourist arrivals represent a smaller percentage of the overall tourism sector.

Visual 2 – Treemap

Title

Domestic Tourist Percentage by State

Chart Type

Treemap

Purpose

Shows the contribution of each state to domestic tourism.

Business Insight

- States with larger blocks contribute more domestic tourists.
- Makes it easy to identify major tourism destinations.

Visual 3 – Line Chart**Title****Monthly Tourist Trend****Chart Type**

Line Chart

Purpose

Displays the monthly trend of total tourist arrivals.

Business Insight

- Tourism activity varies from month to month.
- Peak and low tourism periods can be easily identified.
- Seasonal tourism patterns become visible.

Visual 4 – Matrix/Table**Title****Tourism Data Summary****Type**

Matrix Table

Columns Included

- State
- Total Domestic
- Total Foreign
- Total Tourists

Purpose

Provides detailed tourism statistics for every state in a structured tabular format.

Business Insight

- Enables comparison of tourism performance across states.
- Supports detailed analysis alongside graphical visuals.

Tourism Analysis

Dashboard Title

Tourism Analysis

Purpose

This page focuses on state-wise tourism comparisons using ranking charts.

Visual 1 – Horizontal Bar Chart

Title

Domestic vs Foreign Tourists by State

Chart Type

Clustered Bar Chart

Purpose

Compares domestic and foreign tourist arrivals for each state.

Business Insight

- Domestic tourists consistently outnumber foreign tourists in most states.
- Helps identify states attracting higher international visitors.

Visual 2 – Clustered Column Chart

Title

State-wise Tourist Arrivals

Chart Type

Clustered Column Chart

Purpose

Ranks states according to total tourist arrivals.

Business Insight

- Easily identifies the highest and lowest performing states.
- Enables comparison of tourism across all states.

Dashboard Components Summary

Component	Count
Dashboard Pages	2
KPI Cards	6
Donut Chart	1
Treemap	1
Line Chart	1
Matrix Table	1
Horizontal Bar Chart	1
Clustered Column Chart	1
Slicers	2

Dataset Information

Attribute	Description
Dataset Name	Tourism Dataset
File Format	CSV
Number of Rows	23
Number of Columns	6

Dataset Fields

- State
- Month
- Date
- Month_Number
- Domestic Tourists
- Foreign Tourists

DAX Measures Created

The following DAX measures were developed to support the dashboard:

- Total Domestic
- Total Foreign
- Total Tourists
- Average Domestic
- Average Foreign
- Highest Domestic
- Domestic %
- Foreign %

Tools and Technologies Used

- Microsoft Power BI Desktop
- Microsoft Excel
- Power Query Editor
- DAX (Data Analysis Expressions)

Key Insights

1. **Domestic tourism dominates the tourism sector**, accounting for a significantly larger share of total tourist arrivals than foreign tourism.
2. **Tourist arrivals differ considerably across states**, with a few states consistently attracting the highest number of visitors.
3. **Monthly tourism trends indicate seasonal fluctuations**, highlighting peak travel periods and months with lower tourist activity.
4. **The treemap visualization effectively highlights the contribution of each state**, making it easy to identify states with stronger domestic tourism performance.
5. **Interactive filters enable users to analyze tourism data by state and month**, making the dashboard flexible for different analytical needs.

Conclusion

The **Tourist Analytical Dashboard** successfully converts raw tourism data into meaningful and interactive business insights. Through the use of KPI cards, charts, tables, and slicers, the dashboard provides a comprehensive view of tourism performance across states and months. Users can quickly monitor tourism trends, compare domestic and foreign visitor statistics,

identify high-performing states, and perform interactive analysis using filters. This project demonstrates practical knowledge of **Power BI, data visualization, DAX, and business intelligence**, making it well suited for academic projects, internships, and portfolio presentations.
